

# DEEPAK PARMAR

.NET Developer | Full Stack Engineer | Cloud & AI Specialist

Ahmedabad, Gujarat, India • [deepakparmar4264@gmail.com](mailto:deepakparmar4264@gmail.com) • +91-9079684264 • [linkedin.com/in/deepak-parmar-155993205](https://linkedin.com/in/deepak-parmar-155993205)

## PROFESSIONAL SUMMARY

Results-driven .NET Developer with 4.5+ years of experience designing and building scalable enterprise applications using .NET Core, Angular 19, Web API, and Azure. Strong expertise in Entity Framework, Dapper, XPO ORM, DevExpress, Semantic Search, and SQL Server performance optimization. Contributed to ERP systems with a focus on performance tuning, Clean Architecture, and N-Tier Architecture, along with seamless integrations including QuickBooks. Experienced in implementing AI-driven solutions using ML.NET, RAG pipelines, Semantic Search (Azure AI Search), and predictive analytics. Worked on cloud migration initiatives including lift-and-shift and refactoring from Azure to Google Cloud (GCP), improving scalability, reliability, and cost efficiency. Skilled in building secure, high-performance APIs and modern, responsive UI components.

## TECHNICAL SKILLS

**Languages & Frameworks:** C#, .NET Core, ASP.NET MVC, Web API, WPF, Angular 19, JavaScript, HTML5, CSS3, LINQ, DevExpress

**AI & Machine Learning:** ML.NET, Semantic Search, Azure AI Search, RAG (Retrieval-Augmented Generation), LLM Integration, Predictive Modeling, AI Agents.

**Database & ORM:** SQL Server, Entity Framework, Dapper, XPO ORM, Azure Cosmos DB, Cloud SQL, Azure SQL

**Cloud & DevOps:** Microsoft Azure (App Services, Azure SQL, Blob Storage, Azure Functions, Azure Service Bus, Azure Cosmos DB, AKS, Azure Monitor, Application Insights, Azure AI Search), Google Cloud Platform (App Engine, GKE, Cloud Run, Cloud SQL), Docker, CI/CD, Azure DevOps

**Architecture & Patterns:** Microservices, RESTful APIs, Repository Pattern, Dependency Injection, Singleton Pattern, Clean Architecture, N-Tier Architecture, MVVM, MVC

**Messaging & Background Jobs:** RabbitMQ, Hangfire

**Testing & Tools:** Postman, Swagger/OpenAPI, JMeter, Git, Azure DevOps (Repos, Boards, CI/CD Pipelines), Jira

## PROFESSIONAL EXPERIENCE

**.NET Developer / Software Engineer | Tecmantras**

Feb 2025 – Present | Ahmedabad, Gujarat

### Cloud Migration: Azure to GCP (Ongoing)

- Contributing to enterprise cloud migration using lift-and-shift, replatforming, and modernization approaches.
- Led PoCs for key migration paths: Azure App Services → App Engine, Azure SQL → Cloud SQL, AKS → GKE.
- Prepared detailed assessment reports for 20+ .NET applications — covering migration readiness, risks, dependencies, and effort estimates.
- Containerized selected applications using Docker and deployed on GKE, improving scalability and reliability.
- Supported database migration with backup planning, failover strategies, and performance tuning on Cloud SQL.
- Collaborated with architecture, infra, and development teams to align migration with business and cost goals.

### ERP Platform — Clothing Sector

- Led development of a scalable microservices-based ERP platform for the clothing sector using .NET Core Web API and RabbitMQ for async communication.
- Integrated Semantic Search using Azure AI Search with RAG pipeline, enabling intelligent product and inventory lookup across the ERP.
- Built responsive Angular UIs, enhancing user experience and workflow efficiency.
- Implemented Hangfire for high-volume background jobs including invoicing and data syncing.
- Integrated secure third-party payment APIs for seamless financial operations.
- Improved API performance by 65% and increased user capacity 3x through Redis caching and SQL query optimization.
- Delivered clean, maintainable code within Agile sprints; collaborated across cross-functional teams.

**Senior .NET Developer | Acty System India Pvt. Ltd.***Jun 2022 – Jan 2025 | Ahmedabad, Gujarat*

- Developed ERP modules for web (Angular) and desktop (WPF) platforms, delivering consistent and user-friendly experiences.
- Integrated QuickBooks API to automate financial workflows and improve operational efficiency.
- Built scalable business modules using XPO ORM, CodeSmith, and MS SQL Server for robust data handling.
- Designed database schemas and optimized stored procedures for high-performance data access.
- Tuned LINQ queries and backend logic to efficiently handle large datasets in DevExpress grid controls.
- Implemented MVVM architecture in WPF applications for maintainable, testable desktop software.
- Collaborated with QA and business teams to deliver reliable, high-quality technical solutions across multiple ERP projects.

**Associate Software Engineer | Squalo Infotech***Nov 2021 – Jun 2022 | Jaipur, Rajasthan*

- Gained hands-on .NET development experience working on web and desktop application modules.
- Worked on Java application backend logic and debugging tasks.

**EDUCATION**

---

**Bachelor of Technology — Computer Science & Engineering***2022*Compucom Institute of Technology & Management, Jaipur, Rajasthan | **CGPA: 8.56 / 10****KEY ACHIEVEMENTS**

---

- Improved API performance by 65% through Redis caching and SQL optimization, supporting 3x user capacity growth.
- Delivered migration assessment reports for 20+ enterprise .NET applications, accelerating Azure-to-GCP cloud transition.
- Integrated Semantic Search (Azure AI Search + RAG) into ERP platform, reducing product lookup time significantly.
- Contributed to ERP platforms (PMI, YAC, NS) used by hundreds of users across clothing sector operations.
